FRANS BAUER IN CONCERT

ShowLED Classic curtains were used in the latest "Frans Bauer in Concert" show.

Frans Bauer performed in the Antwerp Sports Palace and the production team decided to use ShowLED Classic starcloths as a backdrop. A total of 22 star cloths of 36 m² were used during the show of this popular Dutch performer. In the centre the production team installed 2 curtains of 12 meter x 3 meter and on the right and left side of the stage 8 curtains of 5 meter x 7 meter. On the outer sides they hung a truss with 3 curtains of 3 meter x 12 meter. The curtains were provided through our Dutch partner Showtex The Nederland.

EUROVISION 2006

No song contest without Classic backdrops!

In 2006 a huge ShowLED Classic backdrop of 1600 m² (consisting of 45 individual 3 meter x 12 meter standard curtains) was used for the Eurovision Song Festival in Athens. The ShowLED partner in Greece was Gerriets Greece a division of Enttech S.A. Any guess on the lead time we had to deliver the curtains in Greece? Two weeks!

DON JUAN MUSICAL

For this project we made a special designed Classic curtain.

Lighting designer Axel Morgenthaler supplied us with a CAD drawing of the exact placement of the LEDs and on how the LED strings needed to be divided over the DMX channels. This way he could create a custom made star field that acted just the way he wanted. The centre curtains had to be finished with arch lines and Velcro so a retro projection screen could be attached. This way the image of a moon could be projected on this screen next to the starfield.

SHOWLED

classic

LEDs

- high quality bluish/white LEDs
- wide viewing angle
- strings of 12 or 16 LEDs
- replaceable pull-and-push LEDs
- patented velcro mounting system (makes the system reusable)
- **NEW** Single coloured Classic LED starcloths on demand

FABRIC

- Trevira CS Molton
- Dekotaft lining
- finishing with hook and loop fasteners for easy joining of more panels and for use in both directions
- stock sizes fast turnaround: 4m x 9m, 5m x 7m, 3m x 12m
- other sizes and shapes on request

CONTROLLER

- 8 output channels (for driving up to 256 LEDs)
- stand-alone mode with Chase Patterns
- DMX-compatible
- controllers can be operated in master-slave mode
- dimensions: 170 x 112 x 43 mm
- weight: 1,20 kg
